PROFESSIONAL PROFILE

SEO strategist with 15 years building, ranking, and monetising websites, now leading AI-search visibility (AEO/GEO) for a 13-client agency book. I pair deep technical SEO with hands-on AI engineering: I build autonomous SEO agents, automate content pipelines, and win citations in Google AI Overviews, ChatGPT, Perplexity, and Copilot. Recent work includes a proprietary brand-consensus AEO framework deployed across 13 accounts and Hermes, a production autonomous SEO agent running 14 cron jobs against a 44-site portfolio. I came into SEO from a 12-year B2B sales career, so I think in revenue and pipeline, not vanity rankings.

SELECTED ACHIEVEMENTS

- Recovered 60,000 impressions/month from a single redirect audit; shipped 635 redirect fixes and enriched 200+ thin pages for post-core-update recovery.
- Built an agency AEO/AI-visibility offering from zero; clients now cited across Google AI Overviews, ChatGPT, and Perplexity on 13 concurrent accounts.
- Architected and deployed programmatic sites at scale: 14,400-page, 12,600-page, and 4,700-page builds on Astro 5 and Cloudflare Pages with per-page JSON-LD schema.
- Designed and shipped Hermes, a production autonomous SEO agent (Claude AI brain, 14 cron jobs) that monitors a 44-site portfolio, detects content decay, and executes enrichment without manual intervention.
- Deployed 25 structured-data schemas via a single GTM tag for a retained hospitality client, with a strategy-to-build handoff that runs without me in the room.
- 15 years surviving every major Google update (Panda, Penguin, Medic, Helpful Content, March 2024 and March 2026 core updates) across an owned portfolio.

EXPERIENCE

SEO Growth Manager, Figment Agency (Remote)

Mar 2024 - Present

Lead SEO and AI-visibility strategy across 13 concurrent client campaigns; run an SEO pod (team plus client book).

- Built the agency's AEO offering from zero; clients now appear in Google AI Overviews, ChatGPT, and Perplexity citations across all 13 accounts.
- Developed a proprietary brand-consensus methodology: mapping co-occurrence signals, citation gaps, and UGC-seeding opportunities across AI answer engines.
- Implemented topical-authority mapping across the full portfolio, driving measurable ranking lifts (60k impressions/month recovered from a single redirect audit).
- Launched YouTube SEO as a new agency revenue line; lead monthly strategy presentations and own retention.

SEO Consultant, Hummingbird, Hospitality Group (Remote, retainer via M&B Marketing)

2024 - Present

- Deployed 25 structured-data schemas (Service, FAQPage, Article) via a single GTM tag across the production site.

- Own research, technical SEO, and content strategy; deliverables flow through Google Docs to the in-house build team.
- Built the strategy-to-implementation handoff so delivery runs without me in every meeting.
