PROFILE

SEO strategist with 15 years building, ranking, and monetising websites, now leading AI-search visibility (AEO/GEO) for a 13-client agency book. I pair deep technical SEO with hands-on AI engineering: I build autonomous SEO agents, automate content pipelines, and win citations in Google AI Overviews, ChatGPT, Perplexity, and Copilot. I came into SEO from a 12-year B2B sales career, so I think in revenue and pipeline, not vanity rankings.

EXPERIENCE

SEO Growth Manager · Figment Agency (Remote)	Mar 2024 to Present
Lead AI-visibility and AEO strategy, and an SEO pod (team plus client book), across 13 client campaigns.	
- Built the agency's AEO offering from zero; clients now appear in Google AI Overviews, ChatGPT, and Perplexity citations across all 13 accounts. - Developed a proprietary brand-consensus methodology: mapping co-occurrence signals, citation gaps, and UGC-seeding opportunities across AI answer engines. - Drove measurable ranking lifts through portfolio-wide topical-authority mapping, including 60,000 impressions/month recovered from a single redirect audit. - Launched YouTube SEO as a new agency revenue line; own monthly strategy presentations and account retention.	
SEO Consultant · Hummingbird, Hospitality Group (retainer via M&B Marketing)	2024 to Present
- Deployed 25 structured-data schemas (Service, FAQPage, Article) via a single GTM tag across the production site. - Own research, technical SEO, and content strategy; deliverables flow through Google Docs to the in-house build team. - Built the strategy-to-implementation handoff so delivery runs without me in every meeting.	
SEO Executive · Totalsurf (Reading)	Oct 2023 to Mar 2024

- Managed end-to-end SEO for 6 concurrent clients: technical audits, content strategy, link acquisition, digital PR.
- Built a systematic reporting framework adopted as the agency standard.
- Achieved page-1 rankings in competitive industries through data-driven keyword targeting.

Independent SEO Practitioner · Self-Employed

2011 to Present

15 years building and monetising my own websites: the foundation of everything I do in SEO.

- **44-site portfolio** across multiple niches, monetised via affiliate, display ads, and lead generation.
- Architect and deploy programmatic sites at scale (**14,400 / 12,600 / 4,700 pages**) on Astro 5 and Cloudflare Pages with per-page JSON-LD schema.
- Diagnosed and shipped March 2026 core-update recoveries: 200+ thin pages enriched, 635 redirect fixes.
- 15 years surviving every major Google update, from Panda and Penguin to Helpful Content.

AGENTIC TOOLING & ENGINEERING

- **Hermes (production):** autonomous SEO agent (Claude AI brain, 14 cron jobs, Telegram control) that monitors a 44-site portfolio and executes enrichment hands-off.
- **Multi-Agent Orchestration:** a Paperclip-style framework coordinating Claude and Codex workers across concurrent dev tasks, with ticket tracking and budget controls.
- **Programmatic Pipelines:** GitHub Actions CI/CD for 12+ sites, automated sitemaps, IndexNow pings, OG image generation via Satori, and WordPress REST API deployment.
